EXPERIENCE:

FORD MOTOR COMPANY ***Dearborn, MI***

Software Test Engineer - (Over-the-Air Software Validation) *January 2024 - Present*

- Engineered a GCP-based test analytics solution using Cloud Run, BigQuery, Gemini Enterprise, and Django, replacing manual reporting with an automated interactive dashboard
- Led cross-functional collaboration with a third-party vendor to define project objectives, Statement Of Work (SOW), and delivery roadmap for in-vehicle automation initiatives.
- Automated repetitive Jira and TestRail tasks by developing custom applications using Jira and TestRail API.
- Established and optimized JIRA workflows and program processes, driving feasibility analysis and execution of automation opportunities.
- Defined mechatronics requirements and provided technical feedback on solution demos for in-vehicle automation initiatives.
- Conducted stress testing and performance validation to ensure scalability and reliability of automation solutions.
- Supported User Acceptance Testing for OTA software updates by refining test scenarios in TestRail and logging defects in JIRA.
- Investigated software issues by analyzing CAN logs and leading Root Cause Analysis with cross-functional teams.
- Contributed to ADAS feature testing, ensuring functionality met safety standards under real-world conditions.
- Performed wire flashing and operated the Diagnostic Engineering Tool (DET) on pre-production vehicle builds.
- Trained teammates on Vector CANalyzer, CANoe, SDLC, and Git/GitHub version control workflows.

ALLY FINANCIAL ***Detroit, MI***

Software Development Engineer in Test (SDET) - (Automation & CI/CD) *July 2022 - December 2023*

- Developed and maintained automated test scripts using Java Selenium, reducing manual testing efforts by 25% across QA cycles.
- Supported overnight code releases of major products, including Ally's new credit card, ensuring flawless deployments impacting over 10 million users.
- Optimized CI/CD pipeline in Jenkins by integrating automated tests, increasing deployment efficiency, and reducing release risk by 40%.
- Led internal training initiatives on automation, accessibility, and regression testing techniques, upskilling 15 engineers across the QA organization.

CAREER NOW BRANDS ***Royal Oak, MI***

Software QA Engineer Intern – Full-Time - (Test Automation & Platform Quality) *January 2020 – Apr 2020*

- Led the migration from Selenium in Java to Cypress in JavaScript, driving adoption across the testing team through a well-received internal demo.
- Built automated testing solutions from technical designs and partnered with stakeholders to refine release processes and reduce regression risk.

NTT DATA ***Southfield, MI***

Software Developer Intern – Full-Time - (ServiceNow Automation) *May 2019 - January 2020*

- Developed an automated business service mapping system for clients in ServiceNow using JavaScript, earning a six-month internship extension based on performance.

EDUCATION & CERTIFICATIONS

EASTERN MICHIGAN UNIVERSITY ***Ypsilanti, MI***

Bachelor of Science in Computer Science *Graduated Apr 2022*

WESTERN GOVERNORS UNIVERSITY ***Salt Lake City, UT***

Master of Science in AI Engineering/Software Engineering *Expected Apr 2027*

SKILLS & LANGUAGES:

PROGRAMMING: Java, Python, JavaScript, C++, SQL, PostgreSQL, HTML, CSS, OOP, TDD, BDD (Gherkin)
TESTING & AUTOMATION: Selenium, Cypress, Playwright, TestNG, Cucumber, Maven, JIRA, qTest, TestRail, BrowserStack, Applitools, Axe
VEHICLE & DIAGNOSTICS: Vector CANalyzer, CANoe, DET, CAN log analysis, OTA validation, ADAS
TOOLS & METHODOLOGIES: Git, GitHub Actions, Github Copilot, Jenkins, Eclipse, ServiceNow, VS Code, Postman, Cloudflare, Google Cloud Platform (GCP), JIRA, Agile/Scrum, CI/CD, Gemini Enterprise API, AI Prompt Engineering, Model Context Protocol, LangChain, RAG, Claude Code, Gemini, OpenAI
LANGUAGES: English (Native/Bilingual), Arabic (Native/Bilingual)
